(54) EMBEDDED ELEVATING LIFT

(57)Abstract:

PURPOSE: To provide an embedded elevating lift which can obtain desirable sealing performance while being excellent in handling performance.

CONSTITUTION: An embedded elevating lift is provided with a pair of cylinders 10, 20 embedded under the floor face 50 so as to vertically move rams 12, 22 with bearers 11, 21 fitted to the upper ends, a hydraulic control unit 30 disposed between both cylinders so as to control the operation of the cylinders, and a cover 40 for covering the upper part of both cylinders and hydraulic control unit while having holes to be pierced with both rams. The cover 40 is formed of a main cover 41 removably fitted to the floor face 50 side and having holes 41a, 41b to be pierced with both rams and an opening 41c corresponding to the upper part of the hydraulic unit, and an auxiliary cover 42 removably fitted to the opening of the main cover 41.
